WARNING

PRODUCT WARNING

THE PRODUCTS GAMECO OFFERS FOR SALE ARE FOR USE ON COMBUSTIBLE AND OTHER DANGEROUS GASES.

NATURAL GAS AND LP GAS ARE EXTREMELY FLAMMABLE AND EXPLOSIVE.

AVOID SERIOUS INJURY AND PROPERTY DAMAGE. IF YOU SEE, SMELL OR HEAR ESCAPING GAS... *EVACUATE AREA IMMEDIATELY!* CALL YOUR LOCAL FIRE AUTHORITY! DO NOT ATTEMPT TO REPAIR.

GOODS OFFERED FOR SALE BY GAMECO ARE NOT FOR USE ON HOT AIR BALLOONS OR AIRCRAFT.

Make sure you are thoroughly trained before you attempt any Gas Installation, maintenance or repair. Improper conditions or procedures can cause accidents resulting in property damage and personal injury. In your state or territory you may need to be licensed to carry out work on Gas Installations – check with your local authority.

Become thoroughly familiar with all the relevant Australian Standards, for example AS/NZS 1596 The Storage and Handling of LP Gas Code and AS/NZS 5601 Gas Installations Code. Read all the ECII® Safety Warnings including "LP-Gas Cylinder Valves", "LP-Gas Excess Flow Valves", "LP-Gas Regulators" and "LP-Gas Filler and Hose End Filling Valves" found in the L-500 & L-102 Catalogues. Refer to the specific instructions and warnings for all other equipment. Check with the gas supplier and local statutory authority for any further material. Follow the recommendations. Some Australian Standards may be the law in your state or territory.

All persons employed in handling Gases must be trained in proper handling and operating procedures.

Make sure the valves and equipment you install are the proper ones for the installation.

Never misuse equipment.

Apply thread joint compound compatible with the gas being used and on external threads only. Make sure compound never comes into contact with other parts of components. Install valves by applying force to wrenching flats only. Tighten pipe threads to the relevant Standard or equipment manufacturer's recommendation. Check for damage and proper operation after equipment installation. Check that installed equipment is clean and free of foreign material.

Check all connections for leaks with a non-corrosive leak detection solution before placing into service. (Gameco's Leak Check may be a suitable solution.)

Install a plug or cap to any outlet connections that are not connected.

Remember to instruct the owner/user/customer in safety and maintenance matters concerning the gas and equipment. See and abide by all Safety Warnings available from the statutory authority, equipment manufacturer and gas supplier. All equipment must be replaced within the manufacturer's recommended service life. Gameco requests that this information be forwarded to your customers.
